Partly cloudy (night)	Mist	Mist	Sunny intervals	Cloudy	Light rain	Light rain	Heavy Rain
Precipitation probability							
00%	00%	<05%	10%	30%	60%	50%	90%

Forecast for Monday 09 Nov 2020

Weather: Some clear spells overnight, with patchy mist, fog and low cloud, especially in south and east. Then a mostly dry and bright start with some sunshine, especially over northern and western fells and most low cloud and murk will lift through the morning. Cloud will thicken from south however and this will bring showery outbreaks of rain in the afternoon. Rain turning heavier and more prolonged in the evening, with perhaps some thundery outbreaks.

Chance of cloud free mountain/hill tops above 800m: 40-60% in morning with broken cloud down to 800m, but 400m or lower at first, especially in east. Chance reducing to 20% in afternoon with more persistent cloud down to 500 or 600m

Visibility: Mostly good beneath cloud, but poor or very poor at first in mist and fog and in afternoon at height in cloud and only a few kilometres in rain at times.

Freezing Level*	2000m	2100m	2200m	2300m	2200m	2200m	2200m	2200m	2100m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Temperatures may reach 15 or 16 C in valleys if sunnier skies hold on into the afternoon, but rather muggy with heavy rain later and quite difficult, rather arduous walking conditions at times.

Forecast for Tuesday 10 Nov 2020

Weather: Outbreaks of rain overnight with a good deal of fog and hill fog to start the day, then mostly cloudy with patchy rain, though fog lifting from the lower slopes in the morning. A more persistent spell of rain in early evening, but clearing late evening with some clear spells developing, though low cloud and patchy mist likely to reform

Maximum wind: Southwest 5-15mph increasing 15-20mph late in day but turning more westerly in evening.

Chance of cloud free mountain/hill tops above 800m: Little chance with persistent cloud often down to 500m, sometimes lower, perhaps 30% chance in afternoon as cloud lifts and breaks a little, this more likely over the east or northeast.

Visibility: Moderate to good beneath cloud but only a few kilometres in rain and generally poor or very poor at height.

Temperature: **Valleys:** Plus 10 rising to plus 12 C
At 800m: Plus 8 C
Freezing level: Above summits.
